

2FM

The 2FM can monitor one or two flow meters. The 2FM is **powered by 2 AAA alkaline or Lithium batteries**. Security tapes are provided to seal the battery cover. The 2FM can be set to count ounces, liters, gallons, glasses or any other measuring unit of your choice. The **meters are read using the LCD screen** and by pressing the Line button on the front panel. An **optional reset key switch** is available for people who wish to clear their counters daily.

Each flow meter is wired to the 2FM using the 4 terminal screws. The LCD back light can be activated using the light button. The electro-luminescent pad will turn itself off automatically after 3 seconds. The 2FM goes into sleep mode after ½ second when the flow meters are inactive. Using the light reduces the life expectancy of the batteries.

Specifications

Recommended battery type: AAA Alkaline or Lithium 2X = 3 Volts DC

Low battery warning: 2.3 volts (display flashes)

Meter consumption: standby mode: 0.066 ma / Reading mode: 0.7 ma

Light consumption (3 sec cycle): 28 ma

Battery life expectancy: 1500 hours in continuous reading mode (without using light)

Size: 2.5 " X 5.0 " X 1 " (6.5 cm X 13.0 cm X 2.5 cm)

Weight: 0.6 lbs (0.3 kg)
