The Micro Mill from RMS Brewing Solutions

They say good things come in small packages, and the Micro Mill from RMS Brewing Solutions might be the perfect example. A premium quality brewery mill at an affordable price. The Micro Mill brings a new level of quality, capability, and versatility to small batch brewery operations. Fully adjustable, the Micro Mill is rated up to 500 lbs of grinding capacity per hour. Featuring Variable Grind Profile Technology and an adjustable feed rate, setup of the Micro Mill can be custom tailored to your application. Containing hardened rolls and superior quality components, what the Micro Mill lacks in size it makes up for in durability and capability.

With a 110v single-phase motor you can set up the Micro Mill near any standard wall outlet and get to work. Perfect for smaller applications, the Micro Mill comes complete with a 12-month warranty and the same quality components and craftsmanship you'd expect from RMS Brewing Solutions. The optional locking caster system makes maneuverability around small locations a breeze and a standard discharge allows for easily grinding into a bucket, a bin, a grist case, or attaching a conveyance system. See for yourself why the Micro Mill from RMS Brewing Solutions is the most capable small-scale brew mill available.

Stats and Specs

- + 500# per hour capacity
- + Hardened, knurled rolls
- + Motor: 1/3 HP, explosion-proof (XP), single phase, 110/230v (can be used with standard wall outlet or hard-wired)
